

## EDUCATION

- Computer Engineer**  
University Of Jordan  
2010 – 2015

## WORK EXPERIENCE

- Mixed Dimensions**  
R&D Software Engineer

10/2015 – 03/2020

### Achievements/Tasks

- Develop information systems by studying operations; designing, developing, and installing software solutions; supports and develops software team. Responsibilities.
- Lead projects and investigate new technologies.
- Tackle complex and open-ended problems across multiple engineering disciplines.
- Perform experiments and use results to inform and develop improvements in software or hardware.
- Evaluate current printer performance for areas for improvement.
- Partner with other engineering teams to implement improvements to current products such as redesigning support structure algorithm based on experimental results.
- Develop plugin on design 3d model software like Daz3D to capture 3D moments and Upload it to API so the user can buy their moments.

## KAIT-AI

Software Engineer

06/2020 – 07/2020

### Achievements/Tasks

- Software Engineer developer work with python analysis and create core technologies

## Socium-Tech

Software Engineer

07/2020 until Now

### Achievements

- Full stack engineer work on python,Django,rest-frame-work , and React-js to create stable website .

## SKILLS

JavaScript

Java

Unreal

Unity

C++

C#

Ruby

Python

vb

Embedded Systems

Qt

Prolog

Mathematics

Algebra

Html

Statics

Css

JQuery

Debug

Analysis

MATLab

Research

3D

Django

React-js

## PROJECTS

Daz3d Plugin

Unity Plugin

Sketch Up Plugin

## LANGUAGES

Arabic  
Native

English  
Very good

## Graduate Project

3D Led Cube 2015
